RE: Bicyclist Policies and Practices

Currently the Security Group is operating under the following policies:

Bicyclists are welcome on the Fermilab Site. This includes bicyclists who are not Laboratory employees as well as employees and visiting scientists.

Bicyclists are allowed to enter the Site via Pine Street, Wilson Road and Batavia Road.

Bicyclists are required to obey Illinois traffic laws as stipulated in the "Illinois Rules of Road" manual and the "Bicycle Rules" manual published by the Illinois Secretary of State. Bicyclists *who* fail to follow the Illinois Rules of the Road may be stopped and issued the standard Fermilab traffic citation.

The current practice is to allow unimpeded access through Pine Street, Wilson Road and the Batavia Road gate during the hours of 0600 to 2000 daily. At those times when the Wilson Street gate is unmanned (1630-0600 Monday through Friday and on weekends) the bicyclists may simply walk their bicycles around the gate.

Between the hours of 8:00 p.m. and to 6:00 a.m. daily, bicyclists are subject to the same access control requirements as employees and visitors driving motor vehicles.

Bicyclists are required to have in their possession a valid form of identification. Notice to this effect is posted at Fermilab's outer boundaries.

Personnel riding Fermilab bicycles must wear PPE (bike helmets).

Roller-bladers are restricted to the Bike Path's and the Main Ring Road (Fermi badged affiliates). Bicyclists are allowed to use any roads not specifically posted as restricted access areas.

Historically Fermilab has not restricted bicycle riding after dark as long as the bicycle had the state mandated reflectors and lights. In actual practice the number of bicyclists *who* ride after dark is very small.
